| <ul style="list-style-type: none"><li>• Award of Garden Merit by RHS</li></ul>                   |
| <ul style="list-style-type: none"><li>• Harvest: July</li></ul>                                  |

<b>Sunburst</b> – Self-fertile
--------------------------------

- |  |
|--|
| <ul style="list-style-type: none"><li>• Dessert variety</li></ul>    |
| <ul style="list-style-type: none"><li>• Black sweet cherry</li></ul> |
| <ul style="list-style-type: none"><li>• Harvest: July</li></ul>      |

**PLUMS** - Grafted on WURS766 semi-dwarfing  
rootstock

**A semi dwarfing rootstock, up to two thirds the vigour of St  
Julian**

**Suitable for cordons, small bush trees, small espaliers, fans  
and stepovers**

**Height: 3m / 10ft**

<b>Plum Blue Tit</b> – Self-fertile
-------------------------------------

- |   |
|---|
| <ul style="list-style-type: none"><li>• A cross between a Gage and a plum</li></ul>                     |
| <ul style="list-style-type: none"><li>• Round medium sized blue plums with a light blue bloom</li></ul> |
| <ul style="list-style-type: none"><li>• Produces yellow flesh, quite juicy of good flavour</li></ul>    |
| <ul style="list-style-type: none"><li>• Award of Garden Merit by RHS</li></ul>                          |
| <ul style="list-style-type: none"><li>• Harvest: mid-August</li></ul>                                   |

<b>Plum Victoria</b> – Self-fertile
-------------------------------------

- |  |
|--|
| <ul style="list-style-type: none"><li>• The popular dual purpose plum</li></ul>                  |
| <ul style="list-style-type: none"><li>• Juicy large bright red fruit with good flavour</li></ul> |
| <ul style="list-style-type: none"><li>• Prolific and reliable</li></ul>                          |
| <ul style="list-style-type: none"><li>• Award of Garden Merit by RHS</li></ul>                   |
| <ul style="list-style-type: none"><li>• Harvest: August-September</li></ul>                      |

**APPLES** - Grafted on semi-dwarfing rootstock M26  
**Produces a semi dwarfing tree. Ideal for smaller gardens as bush trees, cordons and espaliers of up to two to three tiers. Height: 2.5-3.5m / 8-12ft**

**Charles Ross** – Partially self-fertile

- Dual purpose apple – dessert and cooking
- Cross between Cox's Orange Pippin and Peasgood Nonsuch
- Pleasant, sweet, lightly aromatic flavour
- Award of Garden Merit by RHS
- Harvest: September – October
- Pollination Group - 3

**Ashmeads Kernel**

- Russet variety
- Yellowish white flesh, crisp & juicy with excellent flavour
- Award of Garden Merit by RHS
- Harvest: mid-October
- Stores up to February
- Pollination Group - 4

**Howgate Wonder** – Partially self-fertile

- Dual purpose apple – dessert and cooking
- Cross between Blenheim Orange and Newton Wonder
- Large apples striped orange red
- Sub acid in flavour, easily cooking to a fluff. Can be eaten as a dessert apple too but probably best sliced first because of its size!
- Award of Garden Merit by RHS
- Harvest: early October
- Stores up to March
- Pollination Group – 4

## **Katy**

- Bright red dessert apple
- Cross between Worcester Pearmain and James Grieve
- Refreshing taste with slight acidity
- Harvest: late August – September
- Pollination Group – 3

## **Topaz**

- A disease resistant variety
- Medium sized dessert apples red striped over yellow orange background
- Crisp, sweet and juicy flavour with sharpness
- Can be heavy cropping - thin in early summer to increase fruit size
- Harvest: October - One of the latest ripening apples
- Stores up to March
- Pollination group - 3

**APPLES** - Grafted on dwarfing root stock M9  
**Very dwarfing. Suitable for small bush trees, step overs  
(single tier espaliers), small cordons  
Height: 1.8-3m / 6-10ft**

**Fiesta** – Partially self-fertile

- Dessert apple
- Cross between Cox's Orange Pippin and Idared – sometimes known as Red Pippin
- Fruit sweet and juicy with balancing acidity
- Award of Garden Merit by RHS
- Harvest: October
- Stores up to January
- Pollination Group - 3

**Spartan** – Self-fertile

- Dessert apple with sweet, juicy, dark red, crisp fruit
- Flowers are resistant to spring frost
- Good disease resistance and suitable for the small garden
- Spur bearer
- Harvest: October - November
